Note: Real GDP growth and world trade growth (the arithmetic average of world merchandise import and export volumes) are seasonally and working-day adjusted annualised rates. The "fourth quarter" columns are expressed in year-on-year growth rates where appropriate and in levels otherwise. Interest rates are for the United States: the upper bound of the target Federal Funds rate; Japan: the Bank of Japan uncollateralised overnight call rate; euro area: the ECB main refinancing rate.

The cut-off date for information used in the compilation of the projections is 18 May 2016.

1. United States: price index for personal consumption expenditure; Japan and China: consumer price index; the euro area: harmonised index of consumer prices; and the total OECD: private consumption deflator.

2. Per cent of the labour force.

3. Per cent of GDP.
