Introduction

These Services Profiles provide users with statistics on key “infrastructure services”, i.e., transport, telecommunications and financial and insurance services for some selected 150 economies. Coverage will be gradually expanded in the future. The information is derived from multiple statistical domains, such as national accounts, employment statistics, Balance of Payments statistics, FATS, FDI statistics, as well as quantitative indicators, largely sourced from international/regional organizations and specialized bodies. Statistics are presented in standardized format for quick reference.

The first section provides a snapshot of the importance of services in the economy.

- Basic indicators – GDP, services and infrastructure services value added, employment in services, FDI in services, services sectors with GATS commitments, services Economic Integration Agreements notified to the WTO.
- Trade - (Balance of Payments) – Commercial services exports and imports also by main service sector (transportation, travel, other commercial services), main destinations, net commercial services trade.
- FATS sales – Inward and outward sales.

The three other sections focus specifically on each of the three infrastructure service sectors (Transportation, Telecommunications, Finance and Insurance).

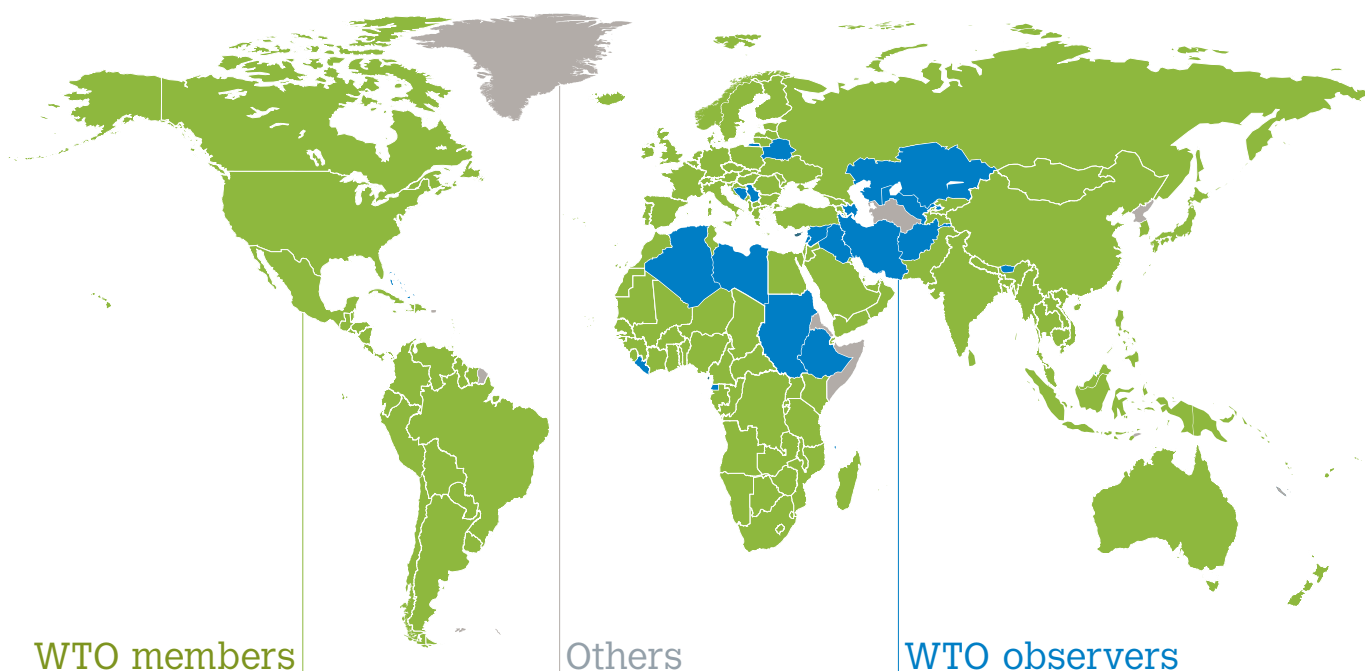

- Investment in economy – Gross fixed capital formation, inward FDI stocks and flows.
- Market indicators – For transportation, e.g., maritime merchant fleet, road and rail lines. For telecommunications, e.g., total telephone subscribers or secure Internet servers. For finance and insurance, e.g., the domestic credit provided by the banking sector as ratio to GDP or insurance density.

- Production and employment – Value added and employment. Transportation only also includes quantitative indicators, e.g., the total number of passenger or freight transported by air or by sea.
- The section on transportation contains other trade-related indicators – Quantitative indicators strictly related to external trade, e.g., international freight loaded by air or by sea.
- Trade - Balance of Payments – Imports and exports of: transportation services, telecommunications services, financial services, and insurance services. For transportation services: share of sea, air and other types of transport (rail, road, etc.).
- Investment abroad –outward FDI stocks and flows.

Shares in world or ranks, as appropriate, are provided whenever possible.

Services Profiles provides statistics on key infrastructure services (transportation, telecommunications, and finance and insurance) for some 150 economies. On one page for each economy, the Profiles gather an invaluable number of statistical indicators of these sectors, making the publication a quick reference tool for market conditions and trade in services in the respective sectors. The information is derived from national accounts, employment statistics, balance of payments statistics, foreign affiliates statistics, foreign direct investment statistics and quantitative indicators largely sourced from international/regional organizations and specialized bodies.
