

World Tariff Profiles 2014

About this publication

World Tariff Profiles is a co-publication of the WTO, ITC and UNCTAD covering market access for goods. This annual publication contains a comprehensive compilation of the tariffs imposed by each of the 160 WTO members plus a number of other countries and customs territories.

Non-WTO members are included in this year's issue if data on the tariffs they applied in 2012 or 2013 is available in the databases of the WTO, ITC or UNCTAD.

Introduction

WTO

The World Trade Organization (WTO) is the only global international organization dealing with the rules of trade between nations. At its heart are the WTO agreements, negotiated and signed by the bulk of the world's trading nations and ratified in their parliaments. The goal is to help producers of goods and services, exporters, and importers conduct their business. The WTO's main function is to ensure that trade flows as smoothly, predictably and freely as possible. It does this by administering trade agreements, acting as a forum for trade negotiations, settling trade disputes, reviewing national trade policies, assisting developing countries in trade policy issues through technical assistance and training programmes and cooperating with other international organizations.

ITC

The International Trade Centre (ITC) is the joint agency of the World Trade Organization and the United Nations. ITC enables small business export success in developing countries by providing, with partners, sustainable and inclusive trade development solutions to the private sector, trade support institutions and policymakers. ITC's strategic objectives are to strengthen the international competitiveness of enterprises, to develop the capacity of trade service providers to support businesses, and to support policymakers in integrating the business sector into the global economy.

UNCTAD

Established in 1964, the United Nations Conference on Trade and Development (UNCTAD) promotes the development-friendly integration of developing countries into the world economy. UNCTAD has progressively evolved into an authoritative knowledge-based institution whose work aims to help shape current policy debates and thinking on development, with a particular focus on ensuring that domestic policies and international action are mutually supportive in bringing about sustainable development.

The *World Tariff Profiles* is a joint publication of the WTO, ITC and UNCTAD devoted to market access for goods. This statistical yearbook contains a comprehensive compilation of the main tariff parameters for each of the 160 WTO members plus other countries and customs territories where data is available. Each country profile presents information on tariffs imposed by each economy on its imports complemented with an analysis of the market access conditions it faces in its major export markets.

Statistics for all countries are given in standardized tables which allow easy comparisons between countries, between sectors and, specifically for WTO members, between bound and applied tariffs as well. The calculations are based on national tariff schedules and imports in conformity with a standard Harmonized System (HS) nomenclature version. To the extent possible, *ad valorem* equivalents (AVEs) of non-*ad valorem* tariffs are estimated and are included in the estimation of tariff indicators. Nonetheless, certain caveats apply in the interpretation of these indicators and the reader is advised to read the methodological notes that precede the statistical tables.

The publication is presented in three main parts. The first part shows summary statistics for all countries and territories for all products, as well as a break-down into agricultural and non-agricultural products. The second part shows for each of these countries and territories one full page with disaggregation by sectors and duty ranges. It also contains a section on the market access conditions faced in their respective major export markets. The third part contains the special topic which usually varies with each new edition and the technical annexes.

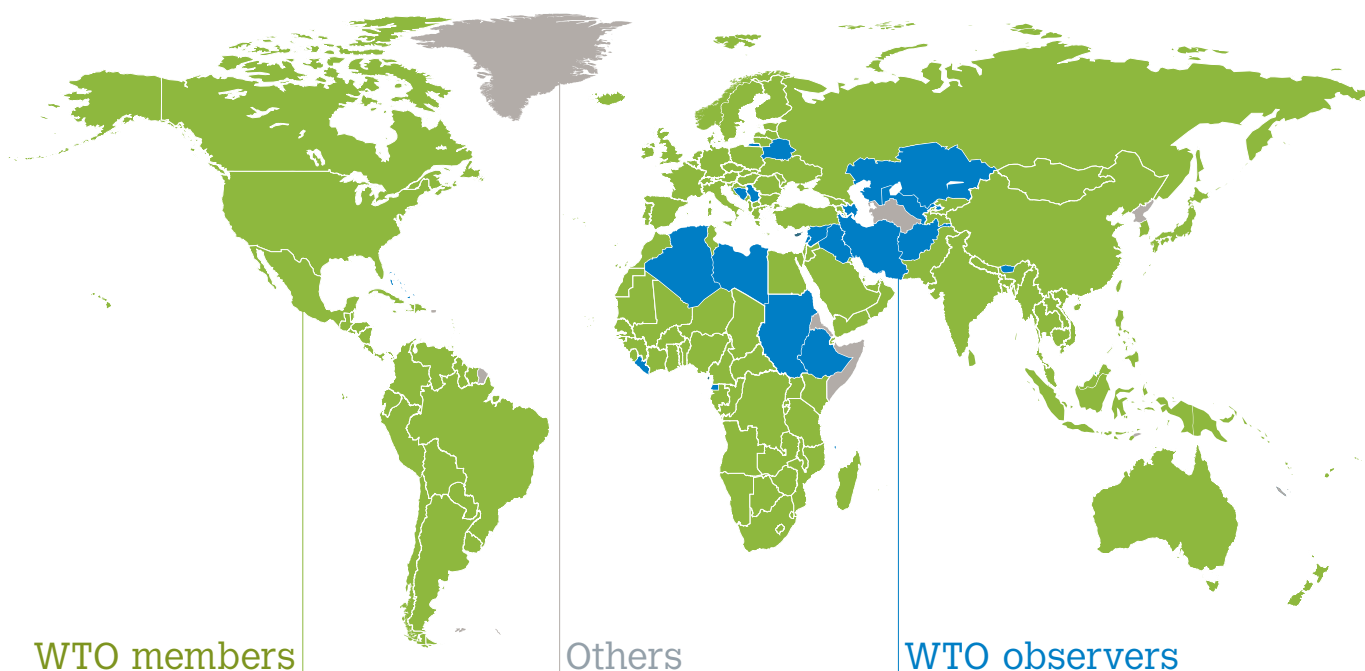

The **summary tables** in the first part are designed to allow cross-country comparison as well as comparison of the levels of bound and applied duties. Apart from the standard indicators like tariff averages, maxima, percentage of duty-free tariff lines, peaks and non-*ad valorem* duties, it also contains indicators of tariff dispersion such as the number of distinct duties and the coefficient of variation. The calculation of these indicators is based, where applicable, on a pre-aggregation to HS six-digit subheadings, which leads to a standardization across countries and thus makes the comparisons more compatible.

The **country tables** are divided into two blocks covering (A) the domestic market access protection and (B) the protection faced in the major export markets. In part A, information on bound and applied duties is shown by duty ranges and by sectors. Information for agricultural and non-agricultural duties is shown separately. In addition, there are indicators on the occurrence of special safeguards and on tariff quotas. In part B, the trade diversification and market access conditions in the five major export markets are depicted, broken down into agricultural and non-agricultural products.

The new **special topic in the technical annexes** is on Anti Dumping measures. The Glossary of tariff and trade-related terms is replaced by "Frequently Asked Questions". The table on data sources is also included in the technical annexes.

WTO members and observers

WTO members (as of 15 August 2014)

Albania	Cuba	India	Mozambique	Solomon Islands
Angola	Cyprus	Indonesia	Myanmar	South Africa
Antigua and Barbuda	Czech Republic	Ireland	Namibia	Spain

General note and abbreviations

Abbreviations

AVG	Average
AG	Agricultural products
AVE	<i>Ad valorem</i> equivalent
HS	Harmonized System (nomenclature)
Max	Maximum duty
MFN	Most favoured nation
NAV	Non- <i>ad valorem</i> duty
Non-AG	Non agricultural products
SSG	Special safeguards
TL	Tariff line
UV	Unit value

Notations

–	Not applicable
0	= 0 (not rounded)
0.0	>0 and <0.05
100	= 100 (not rounded)
100.0	>99.95 and < 100
Blank	Bound or applied duties and/or imports are not available at all for a given country or territory.
<i>Italics</i>	Maxima, based on AVE estimates are printed in italics; this also applies in cases when the <i>ad valorem</i> is part of a compound or mixed duty as ceiling or floor.
US\$	United States dollar

The statistics related to applied tariffs and imports are calculated using data which are based on the HS nomenclature adopted by the country for the reference year. For statistics on bound tariffs, the calculations are based on the approved schedule of concessions of the WTO member. In previous issues of World Tariff Profiles, each schedule is based on the HS version which the member used when it acceded to the WTO. Starting with the 2010 issue of this publication, bound tariff statistics are based on the approved schedule of concessions for each member in the most recent HS version. This might have some implications on the historical series of various bound tariff indicators affected by the use of a different nomenclature. While the member's commitments have not changed as a result of the transposition, some aggregate statistics might have been affected as a consequence of the change to another HS version.

The classification of products into agricultural and non-agricultural is based on Annex 1 of the WTO Agreement on Agriculture which lists all products covered in the Agreement. The Annex enumerates HS codes that are subject to the agriculture negotiations in the WTO and are considered agricultural products. HS codes which are not in Annex 1 are subject to the non-agricultural market access negotiations and are considered non-agricultural products.

In the comparison of bound and applied duties within countries and across countries, the following caveats need to be taken into account besides that of the effects of different HS versions used and nomenclature breakdowns. These are: (1) binding coverage; (2) tariff bindings not fully implemented; and (3) AVEs.

- While binding commitments cover all agricultural products, in principle, this is not always the case for non-agricultural goods. There are a number of WTO members where the binding coverage for non-agricultural products is less – and sometimes much less – than 100 per cent. Also, a number of developed countries have not yet fully bound all the tariff lines in their schedules. Any comparison of bound and applied tariff indicators is only valid in cases of full binding coverage.
- For most WTO members, except the most recently acceded ones, all commitments dating back to the Uruguay Round have by now been implemented. In cases where commitments are not yet fully implemented, one may see MFN applied averages or maxima exceeding the corresponding bound duty indicators.
- Last but not least, the calculation of AVEs may affect the comparison between bound and applied duties when the changes in nomenclature have resulted in the use of different unit values. In other cases, bound duties have been expressed in a way that is not directly comparable with the currently used applied duties. In a number of cases, the estimated MFN applied AVEs were adjusted when the corresponding bound tariff lines were defined in *ad valorem* terms. In these cases, the corresponding bound *ad valorem* duty was used as ceiling for the AVE estimate.

I. Summary tables

Description of column headings

Column headings	Description or method of calculation
Year of MFN applied tariff	Calendar year or start of fiscal year
Binding coverage	Share of HS six-digit subheadings containing at least one bound tariff line. Full binding coverage is indicated by 100 without further decimals. If some tariff lines are unbound but the result still rounds to 100 this is reflected by maintaining one decimal, i.e. 100.0.
Simple average	Simple average of the <i>ad valorem</i> or AVE HS six-digit duty averages.
Duty-free	Share of duty-free HS six-digit subheadings in the total number of subheadings in the product group. Partially duty-free subheadings are taken into account on a <i>pro rata</i> basis.
Non- <i>ad valorem</i> duties	Share of HS six-digit subheadings subject to non- <i>ad valorem</i> duties. When only part of the HS six-digit subheading is subject to non- <i>ad valorem</i> duties the percentage share of these tariff lines is used.
Duties > 15 %	Share of HS six-digit subheadings subject to <i>ad valorem</i> duties or AVEs greater than 15 per cent. When only part of the HS six-digit subheading is covered by such duties, the calculation is done on a <i>pro rata</i> basis.
Duties > 3 * AVG	Share of HS six-digit subheadings subject to <i>ad valorem</i> duties or AVEs greater than three times the national average. When only part of the HS six-digit subheading is covered by such duties, the calculation is done on a <i>pro rata</i> basis.
Concessions not yet implemented in 2013	Share of HS six-digit bound subheadings not yet implemented in 2013. When only part of the HS six-digit subheading is covered by such duties the calculation is made on a <i>pro rata</i> basis.
Maximum duty	Maximum tariff line level <i>ad valorem</i> duty or AVE.
Number of distinct duty rates	Number of distinct duty rates. Non- <i>ad valorem</i> duties are always treated as distinct because AVE calculations would always yield distinct AVEs. For this indicator, however, duties not provided are not included in the count.
Coefficient of variation	Standard deviation of tariff line duty rates divided by the simple tariff line level average of all duty rates. Includes only <i>ad valorem</i> duties or AVEs.
Number of MFN applied tariff lines	Total number of MFN applied tariff lines

Technical notes

Only duties and imports recorded under HS Chapters 01-97 are taken into account. Each applied tariff schedule is validated against the standard nomenclature at the HS six-digit subheading level of the HS version adopted by the country for the reference year. National tariff lines that do not follow this standard (i.e., the first six digits should be based on the standard subheading nomenclature of the HS version used by the country) are discarded and not taken into account. On the other hand, missing subheadings are added. Hence, all calculations are based on the complete standard nomenclature. All simple averages are based on pre-aggregated HS six-digit averages. Pre-aggregation means that duties at the tariff line level are first averaged to HS six-digit subheadings. Subsequent calculations are based on these pre-aggregated averages.

To the extent possible, non-*ad valorem* duties are converted into *ad valorem* equivalents. The methodology used for the conversion is in Technical Annex B of *World Tariff Profiles 2006*.

1. The information provided by the European Union (formerly European Communities) covers its 28 member states even if imports for 2012 refer only to EU 27.
2. The information provided by Switzerland covers Liechtenstein.

Part A.1

Tariffs and imports: Summary and duty ranges

Row titles	Description or method of calculation
Simple average final bound	Simple average of final bound duties excluding unbound tariff lines.
Simple average MFN applied	Simple average of MFN applied duties.
Trade weighted average	HS six-digit MFN tariff averages weighted with HS six-digit import flows for traded national tariff lines.
Imports in billion US\$	Imports in billion US\$.
Binding coverage	Share of HS six-digit subheadings containing at least one bound tariff line. The percentage share is also presented separately for non-agricultural (Non-AG) tariff lines. Full binding coverage is indicated by 100 without further decimals. If some tariff lines are unbound but the result still rounds to 100 this is reflected by maintaining one decimal, i.e. 100.0.
AG: Tariff quotas (in %)	Per cent of HS six-digit subheadings in the schedule of agricultural concession covered by tariff quotas. Partial coverage is taken into account on a <i>pro rata</i> basis.
AG: Special safeguards (in %)	Per cent of HS six-digit subheadings in the schedule of agricultural concessions with at least one tariff line subject to Special Safeguards (SSG). Partial coverage is taken into account on a <i>pro rata</i> basis.

Technical notes

Only duties and imports recorded under HS Chapters 01-97 are taken into account. Each applied tariff schedule is validated against the standard nomenclature at the HS six-digit subheading level of the HS version adopted by the country for the reference year. National tariff lines that do not follow this standard (i.e., the first six digits should be based on the standard subheading nomenclature of the HS version used by the country) are discarded and not taken into account. On the other hand, missing subheadings are added. Hence, all calculations are based on the complete standard nomenclature. All simple averages are based on pre-aggregated HS six-digit averages. Pre-aggregation means that duties at the tariff line level are first averaged to HS six-digit subheadings. Subsequent calculations are based on these pre-aggregated averages.

To the extent possible, non-*ad valorem* duties are converted into *ad valorem* equivalents. The methodology used for the conversion is in Technical Annex B of *World Tariff Profiles 2006*.

Part A.2

Tariffs and imports by product groups

Frequency distribution by duty ranges

The shares by duty ranges in the frequency distribution are based on the *pro rata* shares of tariff line level duties in the standard HS six-digit subheadings. For example, if there are two tariff lines in one HS six-digit subheading, one with a duty of 10 and one with a duty of 20, then half of the HS six-digit subheading is allocated to the 5-10 range and the other half to the 15-25 range. The frequency distribution includes AVEs whenever those were calculated. The percentages by duty ranges add up to 100 per cent for MFN applied duties unless there are non-computable AVEs or missing tariff lines for which no separate category was allocated. For bound duties, the duty ranges add up to the percentage of the binding coverage unless there are non-computable AVEs or missing tariff lines. Please note that the use of different nomenclatures for bound and MFN applied duties affects the comparability of bound and MFN applied duty shares by frequency ranges.

When trade is available at the tariff line level, imports are allocated on a tariff line basis to the respective duty ranges. Otherwise, HS six-digit imports are allocated on a *pro rata* basis to duty ranges, e.g. if there are two tariff lines in one HS six-digit subheading, one with a duty of 10 and one with a duty of 20 then half of the HS six-digit imports are allocated to the 5-10 range and the other half to the 15-25 range.

Share of HS six-digit subheadings subject to non-*ad valorem* duties: when only part of the HS six-digit subheading is subject to non-*ad valorem* duties, the percentage share of these tariff lines is used.

Column heading		Description or method of calculation
Final bound duties	AVG	Simple average of final bound duties excluding unbound tariff lines
	Duty free	Share of duty-free HS six-digit subheadings in the total number of subheadings in the product group. Partially duty-free subheadings are taken into account on a <i>pro rata</i> basis.
	Max	Highest <i>ad valorem</i> duty or calculated AVE within the product group
	Binding in %	Share of HS six-digit subheadings containing at least one bound tariff line. Full binding coverage is indicated by 100 without further decimals. If some tariff lines are unbound but the result still rounds to 100 this is reflected by maintaining one decimal, i.e. 100.0.
MFN applied duties	AVG	Simple average of MFN applied duties.
	Duty free	Share of duty-free HS six-digit subheadings in the total number of subheadings in the product group. Partially duty-free subheadings are taken into account on a <i>pro rata</i> basis.
	Max	Highest <i>ad valorem</i> duty or calculated AVE within the product group
Imports	Share in %	Share of imports falling under product group
	Duty free in %	Share of MFN duty-free imports falling under product group in total imports in that product group. Partially duty-free subheadings are taken into account on a <i>pro rata</i> basis if tariff line imports are not available.

Part B

Exports to major trading partners and duties faced

Column heading		Description or method of calculation
Bilateral imports	in Mill US\$	Total imports of major partner countries
Diversification: 95 % trade in no. of	HS 2 digit	Number of HS Chapters with trade flows after exclusion of 5 per cent of smallest bilateral tariff line trade flows.
	HS 6 digit	Number of HS six-digit subheadings with trade flows after exclusion of 5 per cent of smallest bilateral tariff line trade flows
MFN Average of traded TL	Simple	Simple average of MFN duties based only on tariff lines with imports
	Weighted	Trade-weighted average MFN duty
Preference margin	Weighted	Trade-weighted average difference between the MFN duty and the most advantageous preferential duty. Tariff lines where either MFN or preferential duties cannot be expressed in <i>ad valorem</i> terms have been excluded.
Duty-free imports	TL in %	Duty-free tariff lines in per cent of all bilateral trade flows; includes duty-free preferential treatment. Partially duty-free subheadings are taken into account on a <i>pro rata</i> basis if tariff line imports are not available.
	Value in %	Share of duty-free trade in per cent of all bilateral trade flows; includes duty-free preferential treatment. Partially duty-free subheadings are taken into account on a <i>pro rata</i> basis if tariff line imports are not available.

Definition of groups used in part A.2

Product Group	MTN ¹	Harmonized System nomenclature 2012
Agricultural products (Ag)		
Animal products	17	Ch. 01, Ch. 02, 1601-02
Dairy products	21	0401-06
Fruit, vegetables, plants	12	Ch. 07, Ch. 08, 1105-06, 2001-08
	19	0601-03, 1211, Ch. 13, Ch. 14
Coffee, tea	13	0901-03, Ch. 18 (except 1802), 2101
Cereals and preparations	x15	0407-10, 1101-04, 1107-09, Ch. 19, 2102-06, 2209
	16	Ch. 10
Oilseeds, fats & oils	18	1201-08, Ch. 15 (except 150410, 150420), 2304-06, 3823
Sugars and confectionery	14	Ch. 17
Beverages and tobacco	20	2009, 2201-08
	22	Ch. 24
Cotton	x23	5201-5203
Other agricultural products	x15	0904-10
	x23	Ch.05 (except 0508, 051191), 0604, 1209-10, 1212-14, 1802, 230110, 2302-03, 2307- 09, 290543-45, 3301, 3501-05, 380910, 382460, 4101-03, 4301, 5001- 03, 5101-03, 5301-02

1. Multilateral Trade Negotiations (MTN) categories were first defined in the Tokyo Round and adapted for the Harmonized System in the Uruguay Round. The product group breakdown in this publication deviates slightly from the previous definition, which was based on the HS 1992 nomenclature.

Product Group	MTN ¹	Harmonized System nomenclature 2012
Non-agricultural products (Non-Ag)		
Fish and fish products	11	Ch. 03, 0508, 051191, 150410, 150420, 1603-05, 230120
Minerals and metals	4	2601-17, 2620, Ch. 72-76 (except 7321-22), Ch. 78-83 (except 8304-05)
	9	Ch. 25, 2618-19, 2621, 2701-04, 2706- 08, 2711-15, Ch.31, 3403, Ch. 68-71 (except 6807, 701911-19, 701940-59), 911310-20
Petroleum	97	2709-10
Chemicals ²	5	2705, Ch. 28-30 (except 290543-45, 300590), Ch. 32- 33 (except 3301, 330620) , Ch. 34 (except 3403, 3406), 3506-07, 3601-04, Ch. 37-39 (except 380910, 3823, 382460, 392112-13, 392190)
Wood, paper, etc.	1	Ch.44, 45, 47, 48, 49, 9401-04 (except 940490), 961900
Textiles	x2	300590, 330620, 392112-13, 392190, 420212, 420222, 420232, 420292, Ch. 50-60 (except 5001-03, 5101-03, 5201-03, 5301-02), Ch. 63, 640520, 640610, 6501-05, 6601, 701911-19, 701940-59, 870821, 8804, 911390, 940490, 961210
Clothing	x2	Ch. 61-62
Leather, footwear, etc.	3	Ch. 40, Ch. 41 (except 4101-4103), 4201-05 (except 420212, 420222, 420232, 420292), 4302-04, Ch. 64 (except 640520, 640610), 9605
Non-electrical machinery	7	7321-22, Ch. 84 (except 846721-29), 850860, 852841, 852851, 852861, 8608, 8709
Electrical machinery	8	846721-29, Ch. 85 (except 850860, 852841, 852851, 852861, 8519-8523 but including 852352)
Transport equipment	6	Ch. 86 (except 8608), 8701-08 (except 870821), 8711-14, 8716, 8801-03, Ch. 89
Manufactures, not elsewhere specified	10	2716, 3406, 3605-06, 4206, Ch. 46, 6506-07, 6602-03, Ch. 67, 6807, 8304-05, 8519-23 (excluding 852352), 8710, 8715, 8805, Ch. 90-93 (except 9113), 9405-06, Ch. 95-97 (except 9605, 961210 , 961900)

2. The part of HS subheading 330210 which relates to products originally classified as agricultural has not been taken into account in the Chemicals product group.

Part A.1 Tariffs and imports: Summary and duty ranges

III. Special topic and Technical annexes

A. Special topic: Anti-dumping

When a company exports a product at a price lower than the price it normally charges on its own home market, it is said to be “dumping” the product. The normal value is generally the price of the product at issue, in the ordinary course of trade, when destined for consumption in the exporting country market. In certain circumstances, for example when there are no sales in the domestic market, it may not be possible to determine normal value on this basis. The Anti-Dumping Agreement provides alternative methods for the determination of normal value in such cases.¹ The WTO Agreement does not regulate the actions of companies engaged in “dumping”. Its focus is on how governments can or cannot react to dumping — it disciplines anti-dumping actions.

To provide transparency on the use of anti-dumping (AD) measures, WTO Members are required to notify the Committee on Anti-Dumping Practices twice a year about all anti-dumping investigations, measures, and actions taken. The Committee has adopted a standard format for the reporting of these notifications, which are subject to review in the Committee.

Data on AD measures drawn from WTO Members' notifications are available in the Integrated Trade Intelligence Portal and are the basis for the data shown here.² Some notifications lack detailed information about product classifications according to the Harmonized System (HS) nomenclature. Missing HS coding information was complemented from the Global Antidumping Database (GAD) which is part of the World Bank's Temporary Trade Barriers Database.³ The GAD database is freely available and has detailed information about anti-dumping investigations and measures by country. The use of the data for this publication was kindly authorized by the author of the database. The merged data are available in the UNCTAD TRAINS database.⁴

The following tables show systematically the measure count for both the WTO Member imposing the measures and the trading partner affected by the measures. It is worth noting that AD measures are also applied on exports from some countries currently in accession to the WTO and others that are not WTO Members. AD measures affecting individual EU member countries as exporters have been classified as measures affecting the EU.

Table A1 gives an overview of the (stock of) measures for which a final measure has been put in place and is still in effect by the end of 2013. It indicates also the product coverage in terms of HS-6 digit codes.

Tables A2 and A3 show the AD actions taken in 2013. They list by country how many new investigations have been initiated, how many final measures have been put into effect and how many measures were withdrawn.

1. Article VI of GATT 1994 authorizes the imposition of a specific anti-dumping duty on imports from a particular source, in excess of bound rates, under certain circumstances. Members of the WTO agreed to the establishment of schedules of bound tariff rates, i.e. maximum allowed tariffs. Under Article VI of GATT 1994, and the Agreement on Implementation of Article VI of GATT 1994 commonly known as the Anti-Dumping Agreement, WTO Members can impose anti-dumping measures, if, after investigation in accordance with the Agreement, a determination is made (a) that dumping is occurring, (b) that the domestic industry producing the like product in the importing country is suffering injury, and (c) that there is a causal link between the two. See also: http://www.wto.org/english/tratop_e/AD/measures_e/AD_measures_info_e.htm.

2. See <http://i-tip.wto.org>

3. See Chad P. Bown (2014) “Global Antidumping Database,” available at <http://econ.worldbank.org/ttbd/gad/>

4. See <http://www.unctad.org/trains>

Tables A4 and A5 show more specifically which product groups have been subject to final AD measures.¹ In table A4 the product categories follow the groupings used in this publication in Part A2 of the country tables whereas in table A5 more detailed HS 4-digit headings are used to show in detail which particular products are most frequently subject to final AD measures. As for the countries imposing and/or affected by the AD measures by product groups it was not possible to list them individually. Therefore, they have been classified into three groups. The first two groups cover the G-20, split into the major developed economies known as QUAD and the remainder of the G-20 economies which include mostly the emerging developing economies.² The last group brings together all the other developed countries as well as all the remaining developing economies.

1. Please note that the sum of measures in table A4 is higher than the sum of measures in table A1. This is due to the fact that a number of individual measures cover products which fall in more than one product group. Therefore a single measure may be listed more than once in table A4 as well as in table A5.
2. The choice of the G-20 grouping was done to align this report with the grouping chosen for the WTO trade monitoring reports.

Table A1. Anti-dumping final measures in effect as of 31 December 2013

Description of column headings

Country/Territory		Name of country/territory implementing a final measure as importer or against which a final measure is in effect as exporter
Final measures in effect in the country as importer	Number of Measures	Number of final measures in effect on products imported by the country as of 31 December 2013
	Number of products (In HS 6-digit codes)	Number of distinct HS 6-digit subheadings which include the products on which the country as importer has imposed final measures as of 31 December 2013
Final measures in effect on the country as exporter	Number of Measures	Number of final measures in effect on products exported by the country as of 31 December 2013.
	Number of products (In HS 6-digit codes)	Number of distinct HS 6-digit subheadings which include the products on which the country as exporter is subject to final measures as of 31 December 2013

Polycarboxylic acids, etc, their... derivatives	2917	23	2	13	8	4	12	7
Flat-rolled products of iron/non-alloy steel, of width <600mm, clad	7212	23	16	7	0	1	14	8
Phenols/phenol-alcohols	2907	22	0	22	0	11	5	6
Paper and paperboard, coated with kaolin (china clay), etc, in rolls or sheets	4810	22	5	13	4	10	10	2
Tubes, pipes and hollow profiles, seamless, of iron or steel	7304	22	12	9	1	4	14	4
Flat-rolled products of stainless steel, of a width of less than 600mm	7220	21	5	12	4	8	7	6
Flat-rolled products of other alloy steel, of a width of less than 600mm	7226	21	11	9	1	1	14	6
Heterocyclic compounds with nitrogen hetero-atom(s) only/nucleic acids	2933	20	5	15	0	8	10	2

B. Data sources

The data was pooled from the three organizations¹ respective databases, i.e. WTO's Consolidated Tariff Schedules database (CTS) and Integrated Data Base (IDB), ITC's MAcMap and TradeMap databases and UNCTAD's TRAINS database. The objective was to use for each country or customs territory the latest available information.

For the summary tables and Part A of the country tables, only applied tariffs for the years 2012 or 2013 and imports for 2011 or 2012 were retained. The cut-off date for inclusion of new data in the publication was 30 June 2014.

For Part B in the country tables all notified trade agreements with available data were included in the calculation of the preference margin and duty-free access. Some trade agreements that are currently in-force have not been included for one or more of the following reasons: (1) the agreement – or the supplementary information to it – was not accessible (or the document was unworkable) at the time of the publication; (2) the data presented some problems such as: missing product codes, the products codes of the agreement did not correspond to the product codes of the MFN tariffs of the country; or (3) the agreement entered into force after the country was uploaded in the Market Access Map database (in such cases the agreements will be included in the subsequent update of the database).

For more detailed information on the full contents of each of the respective databases, the reader is referred to the respective websites and/or documents:

2. For some countries, the data for a country period shown in the table could not be used because the data was incomplete, inconsistent and in the case of trade statistics, without corresponding tariff data.

C. Frequently asked questions

How do you choose the countries to include in the publication?

In each issue, we include all WTO Members and some countries or territories for which there is available data for applied tariffs for the reference years. Non-WTO members included in the publication can vary from issue to issue depending on the availability of data on applied tariffs for the reference years. WTO members are always included.

Why is there no applied MFN tariff for some WTO Members?

Unlike data on bound tariffs which are sourced from legal documents at the WTO, applied tariffs are based on notification of the Member to the WTO or from the tariff database of either the ITC or UNCTAD, the two other institutions collaborating with the WTO on this publication. For each issue of the WTP, we use two reference years for the applied MFN tariff, usually the most recent two years. For example, in the WTP 2014 issue, the data on applied tariffs used are for 2013 and if these are not available, we use 2012. If neither of those years is available from any of the tariff database of the three institutions, the statistics referring to applied tariffs are left blank.

Why is there no statistic on binding coverage for AG products?

During the Uruguay Round of tariff negotiations all Members were supposed to have bound all their tariff lines for agricultural products, hence binding coverage for AG is assumed to be 100%.

How do you calculate the tariff average when there are non-*ad valorem* tariffs?

Whenever there is a non-*ad valorem* duty in a certain country schedule, it is converted to its *ad valorem* equivalent (AVE) to the extent possible. For the methodology used in calculating the AVE, please refer to Technical Annex B of World Tariff Profiles 2006. As a caveat though, some non-*ad valorem* duties are too complex and the calculation of the AVE requires additional data not readily available (e.g. duty expressed as "9 + EA max 18.7 + AD S/Z"). In such cases, the duty is not included in the calculation of the tariff indicators.

Why is the applied tariff average higher than the bound tariff average? (Related to this is the case when the maximum applied tariff is higher than the maximum bound tariff.)

When the bound tariff is lower than the applied tariff, it implies a binding violation. However, this is not always true. The following cases show why even if the calculated applied statistics are higher than the corresponding bound statistics, it is possible that there was no binding violation.

- The binding coverage might be less than 100% and the applied duties for unbound products maybe high thus affecting the average and the maximum duty. Please note that the bound tariff average is based only on tariff lines that are bound. The applied duty average is based on the full tariff schedule following a certain Harmonized System (HS) nomenclature version. Some WTO members who acceded during the Uruguay Round had not fully bound their entire tariff schedule.
- The WTO member has only recently acceded and the concessions are still not fully implemented. As the bound duty statistics presented in the WTP refer to the final bound duty at the end of the implementation period, the applied duties could still be higher than the bound duties.
- The bound and applied tariff schedules are in different HS versions. For each WTO member, the publication uses the approved or certified bound tariff data in the most recent HS version. For example, a Member who joined during the Uruguay Round has its original bound tariff schedule in HS 1992. On the other hand, applied tariff is in the HS version used by the Member which in practice is usually the most current version of the HS (say, HS 2012). In order for the bound tariff information to be more aligned with the applied tariffs, the schedule of concessions is regularly transposed or adapted to newer HS versions. However, all the other Members have to agree to the new schedule in a different HS version to ensure that no change in the concessions happened during the transposition. This process of certifying a schedule in a more recent HS version often takes a long time. Hence, it is more often the case that the bound tariff schedule is in an older version of the HS compared to the one used for the applied tariff. The difference in HS versions is not expected to have changed any of the Member's commitments but might have affected the aggregate statistics due to the differences in HS subheading breakdown between versions.
- The national tariff line breakdown might be different between the bound and applied tariff schedules even within the same HS version, which could have affected the calculated averages. In the simple example below, the applied tariff schedule was more detailed than that for bound tariff thus having an average higher than the bound tariff even if there's no binding violation.

Bound and Applied Tariffs for HS 2012 subheading 0810.90

(Guavas, mangoes and mangosteens, fresh or dried)

Bound Tariff			Applied Tariff		
Code	Description	Duty (%)	Code	Description	Duty (%)
0810.90.10	Mangoes	10	0810.90.11	Mangoes, fresh	10
			0810.90.19	Mangoes, dried	9
0810.90.90	Guavas and mangosteens	5	0810.90.90	Guavas and mangosteens	5
	Average	7.5		Average	8

- The *ad valorem* equivalents (AVE) may affect the comparison between bound and applied duties when the changes in nomenclature have resulted in the use of different unit values. Please refer to Technical Annex B of World Tariff Profiles 2006 for the methodology on the AVE calculation.
- For some WTO members who have commitments on Other Duties and Charges (ODCs), the data available on applied tariffs may include the ODCs, and it is not possible to separate the ODC from the import duty.

Why is my calculation for simple tariff average of a country different from the one in the World Tariff Profiles?

- If there are non-*ad valorem* duties, the calculation of AVEs for the WTP might be different from the calculated AVEs from other sources.
- The WTP uses two-stage averaging. First, the average of all national tariff lines within the same HS six-digit subheading is calculated and then the mean of all HS subheading averages is taken. This is to minimize the variability caused by the different national tariff line breakdowns within the subheading. All reporters using the same HS version would have the same number of subheading (i.e., second stage) averages from which the country average or sectorial or product group average is calculated.

My country did not change its applied tariff rates from that of the previous year but why did the average change?

- If there are non-*ad valorem* duties, the calculated AVEs could have changed because new reference years for imports are used every issue.
- Even without non-*ad valorem* duties in a tariff schedule, it's possible that the breakdown changed for some reasons but the applied tariff rate for each product remained the same. Please see the example below on the average for HS subheading 0810.90 which changed because of the difference in the breakdown of tariff lines.

Year 1 Applied Tariff			Year 2 Applied Tariff		
Code	Description	Duty (%)	Code	Description	Duty (%)
0810.90.10	Mangoes	10	0810.90.11	Mangoes, fresh	10
			0810.90.19	Mangoes, dried	10
0810.90.90	Guavas and mangosteens	5	0810.90.90	Guavas and mangosteens	5
	Average	7.5		Average	8.3

Why are there maximum values that are italicized?

To differentiate between a maximum based on an *ad valorem* tariff and one based on an AVE, the value of which can vary depending on the unit value of the product for the reference period, the maximum value based on an AVE is italicized.

Why does the same year for applied tariff appear for two consecutive WTP issues?

For each issue of the WTP, we use two reference years for the applied MFN tariff, usually the most recent two years and select the latest year available. There is always a one-year overlap on the reference years for consecutive issues of the WTP. For example, for WTP 2013, the reference years for tariff are 2012 and 2011 and for WTP 2014, they are 2013 and 2012. If, during the preparation

for WTP 2013, the 2012 data for Country X is already available, then 2012 data is used. However, if for WTP 2014 Country X has no available data yet for 2013 in any of the databases, the data for 2012 is re-used.

Why does the same year for applied tariff appear for two consecutive WTP issues but with different statistics?

The answer to why the same year appears for two consecutive WTP issues is in the **previous question**.

The reason why the statistics differ could be the presence of non-*ad valorem* duties in the tariff schedule. Different reference years on imports are used for the calculation of AVEs for each issue and hence the AVEs can change.

Another reason could be that the reporter itself revised the data previously submitted for the relevant year.

Why did the bound tariff statistics differ from the WTP issue of the previous year?

In theory, bound tariffs do not change unless there is a renegotiation of a Member's commitments. Hence, the most intuitive answer would be that the Member renegotiated some or even all of its commitments during the course of the year.

However, there could be other reasons why, even if there were no changes in the commitments, some aggregate statistics changed. One of these could be the presence of non-*ad valorem* duties in the bound tariff schedule. Different reference years on imports are used for the calculation of AVEs for each issue and hence the AVEs can change.

Another reason could be the use of an approved schedule in a more recent HS version. Please refer to the question "why is the applied tariff average higher than the bound tariff average?" for additional explanation.

My country imports mostly from partners with whom we have a free trade agreement and imports come in duty free. Why is the calculated trade weighted average much higher than what is expected?

The trade weighted average presented in Part A.1 of each country page is based on applied MFN duty weighted by total imports and does not take into consideration non-MFN duties (mostly preferential) applied to certain trading partners. In effect, this is the trade weighted average assuming all imports are levied the MFN rate.

In Part B, the statistics show that exports from my country to a certain partner (i.e. imports of the partner from my country) do not enjoy preference as reflected by the preferential margin and % duty free imports. However, in reality our exports enjoy preferential rates in this market. Why don't the statistics show this?

The market access statistics calculated in Part B require complete information on non-MFN tariff regimes which each market or importer applies to each of its import partners. However, there are non-MFN or other preferential tariff regimes which are not officially notified to the WTO nor are these available in the other tariff databases. The statistics are based only on non-MFN tariff regimes for each market for which we have data.

How can I get the EXCEL version of the country tables and summary tables for previous WTP issues?

At present there is no online facility yet to extract these tables. However, these can be requested from the Market Access Intelligence Section of the WTO. Send your email request to mai@wto.org specifying which data years or WTP issues you are interested in.

How can I install the mobile version of the World Tariff Profiles on my device?

The statistics published in the latest WTP can be accessed on your mobile device. The application uses ROAMBI, a business intelligence software that can be downloaded from the Apple store free of charge, and utilizes different views to display the data. The views can then be downloaded directly on your mobile device. This application works on the iPad, mini iPad, iPhone and iPod Touch. To request the views, email mai@wto.org and specify World Tariff Profiles views.

Acknowledgements

Acknowledgements are due to all the data providers, mostly national administrations or WTO delegations who have made this information available including through notifications presented as special topic. In a number of cases, data has been made available on national websites or through regional organizations. Given the vast amount of statistical data and metadata that needed to be processed, and because this information is not available in one single organization, this publication was only possible as a joint effort of the WTO, ITC, and UNCTAD. Each of the three organizations has a proven track record and comparative strengths in the field of tariff analysis.

The WTO, as the repository of its members' binding commitments on goods and also as repository for members' notifications in a number of trade policy areas has been at the core of this undertaking. Trade and tariff data were sourced from either the WTO or ITC databases depending on which one had the most recent tariff or trade data for the years covered. In addition, the ITC contributed all the AVE estimates and preferential duties. Missing trade data for some countries were also sourced from the UN Commodity Trade Statistics Database (COMTRADE).

The preparation of this publication was coordinated by Jürgen Richtering (WTO) in close collaboration with Mondher Mimouni (ITC) under the overall supervision of Hubert Escaith, WTO's Chief Statistician. Adelina Mendoza (WTO) was responsible for calculating the indicators presented and preparing the tables in their final layout. Xavier Pichot (ITC) was in charge of providing the input dataset and of calculating the AVEs. Fabien Dumesnil (UNCTAD), Alessandro Nicita (UNCTAD), Ralf Peters (UNCTAD) and Jürgen Richtering (WTO) prepared the data and tables for the Special topic on Anti-dumping. They would like to thank Chad P. Bown (World Bank) for allowing the use of GAD data. At the ITC, thanks are also due to the data collection team coordinated by Laetitia Rinderknecht as well as to Mohamed Kimouche for data processing.

Finally, the contributions of the WTO Information and External Relations Division and WTO printing facilities for the production and the French and Spanish translators in the Language Services and Documentation Division for rendering the publication in the WTO's other official languages are also hereby acknowledged.

any comments or suggestions for improvement please contact the Market
Access Intelligence Section (mai@wto.org).

World Tariff Profiles 2014 provides comprehensive information on the tariffs imposed by over 160 countries and customs territories. New in this edition are the special topic on anti-dumping measures and a compilation of frequently asked questions on the statistics published. The regular summary tables in the first part of the publication allow for quick cross-country comparisons on the bound and applied duties for all products, as well as for agricultural and non-agricultural products. In the second part, a one-page summary for each country lists the tariffs imposed on its imports and the duties it faces when exporting to major trading partners.

The publication is jointly prepared by the World Trade Organization, the United Nations Conference on Trade and Development (UNCTAD) and the International Trade Centre (ITC).
