Committee on Development and Intellectual Property (CDIP)

Seventeenth Session
Geneva, April 11 to 15, 2016

MAPPING OF SOUTH-SOUTH COOPERATION ACTIVITIES WITHIN THE WORLD INTELLECTUAL PROPERTY ORGANIZATION

prepared by the International Bureau of WIPO

1. The Committee on Intellectual Property and Development (CDIP), at its thirteenth session, held in May 2014, while discussing Evaluation Report on the Project on Enhancing South-South Cooperation on IP and Development Among Developing Countries and Least Developed Countries (document CDIP/13/4), requested the Secretariat to undertake a Mapping exercise of South-South Cooperation Activities within the World Intellectual Property Organization (WIPO).

2. Accordingly, a Mapping of South-South Cooperation Activities within the World Intellectual Property Organization in the 2014/15 biennium was carried out.

3. The CDIP is invited to take note of the information contained in the Annex to this document.

[Annex follows]
I. INTRODUCTION AND DEFINITIONS

1. The present document was prepared with a view to providing Member States with an overview of the IP-related development activities undertaken by the Organization in the context of South-South Cooperation. The exercise was undertaken in compliance with a recommendation of an independent evaluation of the Development Agenda Project on Enhancing South-South Cooperation on IP and Development among Developing Countries and LDCs (2012-2015), which called for a “mapping of existing South-South activities within WIPO”\(^1\).

2. The independent evaluation of the DA Project on SSC confirmed the relevance and the significant potential added value of SSC to Member States and direct beneficiaries, as well as to international priorities. It noted that SSC, complementing North-South cooperation, was “an effective instrument to capitalize on experience that is especially useful in the light of the particular challenges that developing countries and LDCs face in using the IP system for their socio-economic development.”\(^2\)

3. An operational definition of South-South Cooperation (SSC) is found in the Framework of Operational Guidelines on United Nations support to South-South Cooperation as “a process whereby two or more developing countries pursue their individual and/or shared national capacity Development objectives through exchanges of knowledge, skills, resources and technical know-how, and through regional and interregional collective actions, including partnerships involving Governments, regional organizations, civil society, academia and the private sector, for their individual and/or mutual benefit within and across regions. South-South cooperation is not a substitute for, but rather a complement to, North-South cooperation.”\(^3\)

4. Similarly, the High Level United Nations Conference on South-South Cooperation which took place in Nairobi (December 2009) reaffirmed that “South-South Cooperation is a common endeavor of peoples and countries of the South, born out of shared experiences and sympathies, based on their common objectives and solidarity, and guided by, inter alia, the principles of respect for national sovereignty and ownership, free from any conditionalities. South-South cooperation should not be seen as official development assistance. It is a partnership among equals based on solidarity.”\(^4\)

---

\(^1\) The evaluation report was presented to the CDIP at its 13\(^{th}\) session (May 2014). See Document CDIP 13/4 Evaluation Report on the Project on Enhancing South-South Cooperation on IP and Development among Developing Countries and LDCs.

II. SOUTH-SOUTH COOPERATION WITHIN WIPO

5. SSC approaches to promote exchanges among developing countries and LDCs in the field of IP are a long standing component of WIPO’s work, although they have not been conceptualised as such. As a result, there are no key policy or strategy documents, nor guidelines, on the subject. Explicit references to SSC are included for the first time in the WIPO Program and Budget 2016-17, with reference to Program 9 (Africa, Arab, Asia and the Pacific, Latin America and the Caribbean, Least Developed Countries) and Program 20 (External Relations, Partnerships and External Offices, WIPO Brazil Office).

6. Guided by the definitions of SSC provided and accepted within the United Nations system, the WIPO Secretariat has reviewed, for the purpose of this mapping exercise, its development activities and identified those which, inspired by the above-enunciated principles and in line with its mandate, facilitate mutually beneficial exchanges of knowledge and experiences among developing countries and LDCs, and promote innovation, creativity and the effective use of the intellectual property system for economic, technological, social and cultural development.

7. In the framework of the principles mentioned in paragraph 6. above, the mapping of SSC activities presented in the Appendix to this document contains a list of activities undertaken by the Organization where both the beneficiary country/ies and the host country/provider were a developing country or a Least Developed Country (LDC), and where all, or the majority of, speakers/experts were from a developing country or LDC.

8. Included in the mapping are a number of activities undertaken by WIPO with the participation of Funds in Trust from developing countries, i.e. Brazil and Republic of Korea. Excluded are activities that took place a) at WIPO Headquarters in Geneva; b) in a developed country; c) with funding from developed countries, including under Funds-in-Trust from developed countries; d) in countries with economies in transition; e) with the involvement of only one country (national activities, with national participants and speakers).

9. The present mapping exercise was carried out using WIPO’s IP-Technical Assistance Database (IP-TAD) as a source of information on the activities undertaken by the Organization in the 2014-15 biennium.

---

5 See CDIP/13/4 Evaluation Report on the Project on Enhancing South-South Cooperation on IP and Development among Developing Countries and LDCs, Conclusion 1, p. 4: “While within WIPO, South-South cooperation had been applied before, it was for the first time addressed by a specific project bringing needed focus and highlighting the importance of the issue within the Organization.”

6 See WIPO Program and Budget for the 2016/17 Biennium, under Program 9, par. 9.11., p.73: “Noting the increasing relevance of sub-regional, regional as well as interregional cooperation, including South-South cooperation, among developing countries, the Regional Bureaus will play an instrumental role in facilitating the modalities of this horizontal cooperation.”

7 A broad definition of what WIPO qualifies as “development-oriented activities” may be found in document WO/PBC/24/17, ANNEX II, on the “Revised definition of Development Expenditure for Accounting Purposes”. The document qualifies as development activities those which are financed and “provided by WIPO to developing countries and Least Developed countries (LDCs) and the equivalent expenditure is not provided to developed countries”. The document also states that “[C]onsistent with past practice, countries with economies in transition are included for the purpose of the Program and Budget.” However, the UN principles of SSC have been developed with a view to address cooperation among developing and Least Developed Countries (LDCs). In line with these principles, the activities surveyed and reported in this mapping exercise concern specifically this group of countries.

8 The activities reflected in the attached mapping in compliance with the above-mentioned definition (par 6.) might include, in a few cases, a small number of participants from developed countries or countries in transition. In such cases, participants from developed countries have funded their own participation in the activity.

9 The Intellectual Property Technical Assistance Database (IP-TAD) provides information on WIPO’s technical assistance activities where one or more of the beneficiaries was a developing or least developed country, or country in transition. For practical purposes to allow the preparation of this document, the cut-off date for the collection and analysis of the data on SSC
III. MAPPING OF SOUTH-SOUTH ACTIVITIES

10. This mapping exercise is WIPO’s first attempt to identify and group activities which, according to the UN definitions of SSC, and in line with WIPO mandate, may be considered as SSC. A total of eighty three (83) activities were identified, for the biennium 2014-2015, based on the previously mentioned principles relating to South-South Cooperation.

11. For the purpose of this mapping exercise, SSC activities were grouped into nine (9) main IP subject areas. They were further listed by chronological order within the 2014-2015 biennium.

12. For each activity listed in the Appendix the following information is provided:

- Date of the activity;
- Title;
- Objective;
- Expected result;
- Place / Venue / Host Country;
- Beneficiary country(ies);
- Number of participants;
- Language(s) used; and
- Cost.

13. It is recalled that the United Nations Joint Inspection Unit recommended that “[t]he legislative and governing bodies of the United Nations system organizations should request the Executive Heads to apportion a specific percentage – not less than 0.5 per cent – of core budget resources for the promotion of South-South cooperation (SSC) in their respective areas of competence, in consultation with program countries”.  

14. The non-personnel cost entailed in carrying out these SSC activities amounted to 3,513,085 Swiss francs. This represented 1.5 per cent of the total non-personnel costs in the 2014/2015 biennium.

15. The information contained in the Appendix to this document may also be found on the South-South IP Technical Assistance Database http://www.wipo.int/sscip/tad.

[Appendix follows]
IV. APPENDIX: List of South-South Cooperation Activities within the World Intellectual Property Organization
